ABOUT ME

Motivated high school senior with a BACE certification, I have always had a passion for science and medicine. Throughout high school I have taken 10 Advanced Placement courses showing a commitment to my work, analytical thinking, and good time management. I am particularly passionate about biomedical science and look to pursue a degree that provides a strong foundation for admission into medical school. I would work well as a team player, because of my 10 years of experience in sports, However I would work well as a solo operator aswell, I communicate effectively, and possess a strong work ethic.
